The preliminary amendment received 1/18/05 and the IDS's received 11/24/03 and 5/14/04 have been entered and claims 19-31 are currently pending in this application. Please update the specification regarding the related cases. Further, please inform the examiner as to how the CIP application differs from each application in order to select the proper priority date for this application.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 19-28, drawn to a system for detecting sterilization, classified in class 435, subclass 288.7.
- II. Claims 29-31, drawn to a kit for assessing viability of a spore, classified in class 435, subclass 975.

The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the system could be practiced without the kit. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
